

This project is for The Starlight Dance Group Ltd. that own and run Chameleon dance and costume hire, who subsequently need an inventory management system, and a catalogue of their props, set, and costumes. The Chameleon inventory management system which is a web-based service that provides stock monitoring and stock updates, alongside the catalogue to be able to efficiently manage stock, and show customers the catalogue of items available. This product is unlike other services as it provides a modern, capable, custom built system for inventory management and item display.
